

Prop. 4.1-4.2
Delegation paradox

$v_i > g_i \rightarrow$ keep task human
(interior x_i^* otherwise)

*why humans
keep it*

Prop. 4.3
Bottleneck migration

$\partial S_i / \partial x_i = v_i - \tau_i > 0$
 $\rightarrow$ load moves to review

*so the firm
must hire*

Prop. 4.4
Governance-capacity

$\partial c^* / \partial f = \lambda k > 0$
 $\rightarrow$ friction sets staffing

Cor. 4.5

interior optimal
friction f^*

verification cost $v_i(f)$ — decision parameter AND service-time component
